PROFESSIONAL SUMMARY

Backend Operations Specialist and PEC Registered Electrical Engineer (MSc) with 3+ years of experience across digital platform operations, solar energy systems, and technical project delivery. Currently managing property ad listings and AI content quality assurance at Dubizzle Labs (Bayut Saudi Arabia). Trilingual in English, Arabic, and Urdu, with a strong track record of delivering operational accuracy and process quality in high-volume, fast-paced environments.

CERTIFICATIONS & PROFESSIONAL MEMBERSHIPS

Registered Engineer (RE)

Pakistan Engineering Council (PEC) · Electrical Engineering Division

WORK EXPERIENCE

Backend Operations Specialist

May 2026 – Present

Dubizzle Labs (Bayut Saudi Arabia) · Lahore, Pakistan

- Manage and quality-check property ad listings across the Dubizzle Labs (Bayut Saudi Arabia) platform, ensuring accuracy, completeness, and compliance with listing standards.
- Review and correct AI-generated content, identifying errors in descriptions, classifications, and data entries to maintain platform integrity.
- Collaborate with cross-functional teams to flag systemic AI output issues and contribute to ongoing process improvement initiatives.
- Maintain data quality standards across thousands of active listings, directly supporting user trust and platform reliability.

Lead Auditor & Telesales Supervisor

Feb 2025 – Apr 2026

Dubizzle Labs (Bayut Saudi Arabia) · Lahore, Pakistan

- Revived dormant leads pipeline and converted inactive prospects into closed-won deals, improving revenue recovery.
- Audited telesales team performance, identified skill gaps, and implemented targeted coaching to raise conversion rates.
- Developed KPI tracking to monitor team efficiency and accountability across the sales floor.

Electrical Engineer – Solar Projects

Feb 2024 – Feb 2025

ED Energy · Lahore, Pakistan

- Led end-to-end installation and commissioning of solar PV systems, ensuring compliance with technical and safety standards.
- Managed system integration and on-site troubleshooting, reducing downtime and maximizing energy output for clients.
- Coordinated with contractors and site teams to deliver projects on schedule and within budget.
- Produced technical inspection reports and client-facing performance documentation.

Electrical Engineer – Industrial Internship

Aug 2022 – Sep 2022

Heavy Mechanical Complex (HMC) · Taxila, Pakistan

- Gained hands-on exposure to industrial power systems: circuit breakers, furnaces, motors, and transformers.
- Observed operations across Powerhouse, Pattern Shop, Steel Foundry, and Forge Shop departments.
- Contributed to the "Design of Electric Machines and Transformers" project under senior engineer supervision.

EDUCATION

Master of Science – Electrical Engineering

2023 – 2025

University of Management and Technology (UMT), Lahore

Focus: Power Systems & Renewable Energy

Bachelor of Science – Electrical Engineering
University of Engineering and Technology (UET), Taxila

2018 – 2022

High School – Scientific Track
Anwar AL-Huda School, Sana'a, Yemen

2013 – 2016

SKILLS & COMPETENCIES

Operations & QA: Ad listing management, AI content review & correction, data quality assurance, process documentation

Sales & CRM: Lead generation, telesales auditing, KPI tracking, pipeline management, team coaching

Engineering: Solar PV systems, power systems analysis, transformers & motors, electrical troubleshooting

Tools: AutoCAD Electrical, MATLAB, MS Office Suite, CRM platforms

Languages: Arabic (Native) · English (Professional) · Urdu (Conversational)
